Registration deadline is June 10th

Managing in a Changing Environment 604

Courses geared toward the needs of small communities and rural departments. In this course students begin developing a marketing plan for fire prevention using resources from the first two courses and those already in place in their communities. Upon completion of this course, students will be able to continue developing, refining, and applying a marketing plan that will outline target hazard risks, identify significant opponents, and present allies who may be available within their community.
